

DEMYSTIFYING LONG COVID

INTERNATIONAL CONFERENCE 2023

HYBRID MEETING | 7-9 DECEMBER 2023 | MADRID, SPAIN

Long COVID | a multisystem condition posing a significant burden on individuals and public health.

Multiple uncertainties and unknowns remain surrounding Long COVID. This means that real-life data is a vital tool in unravelling these mysteries.

Late-breaking abstract submission for the Demystifying Long COVID-19 International Conference 2023 will open on **Monday 2 October until Friday 13 October 2023** to allow for the submission of abstracts containing data which were incomplete at the time of the general abstract submission deadline.

We invite you to submit your data and help move the field forward.

Make sure to submit your late-breaking abstract(s) before the deadline to share your research, discuss your findings, and shape the program of this cutting-edge conference!

Topics for Submission:

- Epidemiology
- Syndrome Definition and Diagnosis
- Pathophysiology
- Long COVID in Diverse Populations
- Long COVID and Vaccination
- Treatment Strategies
- Clinical Management and Models of Care
- Prevention of post-COVID conditions

Program Chairs
